from--

It is asserted that since such amendments are made in compliance with M.P.E.P. §608.01(b) to correct formalities it is asserted that no new matter has been added to the application.

In the Claims

Please amend Claims 2 - 4, 6 - 15 as follows:

2. The package amusement device of claim [1] 16 wherein said sense-detectable signal is sound.

3. The package amusement device of claim [1] 16 wherein said sense-detectable signal is light.

4. A method of manufacturing [a] the package [material] amusement device of claim 16 comprising:

placing a plurality of detection means with said packaging [material] means;

coupling said plurality of detection means to [a plurality of] one or more microprocessors;

coupling said one or more microprocessors to said sense-detectible signal generating means.

Pat. Appl. Ser. No.: 08/581,890
Resp. to 06/23/97 Office Action
DRAFT Amendment/Resp.: 3 of 12

6. The egg-shell shaped amusement device of claim [5] 17 wherein said detection means is a plurality of heat-sensitive detectors.

7. The egg-shell shaped amusement device of claim 6 wherein said plurality of heat-sensitive detectors are set to respond at different temperatures.

8. The egg-shell shaped amusement device of claim [5] 17 wherein [the] said gift is a toy dinosaur.

9. The egg-shell shaped amusement device of claim [5] 17 wherein [the] said gift is a toy chick.

10. The egg-shell shaped amusement device of claim [5] 17 wherein [the] said gift is a toy bunny.

11. The egg-shell shaped amusement device of claim [5] 17 wherein said gift is attached to a spring.

12. The egg-shell shaped amusement device of claim [5] 17 further comprising a heat-labile gas-generating means housed within said egg-shell housing.

13. The egg-shell shaped amusement device of claim 12 wherein said heat-labile gas-generating means comprises acetic acid and sodium bicarbonate.

Pat. Appl. Ser. No.: 08/581,890
Resp. to 06/23/97 Office Action
DRAFT Amendment/Resp.: 4 of 12

14. The heat-labile gas-generating means of claim 13 wherein said acetic acid and sodium bicarbonate are separated from each other by a heat-labile membrane.

15. The egg-shell shaped amusement device of claim [5] 17 further comprising a heat-[liable]labile material within [the construction of] said egg-shell housing.

Please cancel claims 1 and 5, without prejudice, and in lieu thereof, please add new Claims 16 and 17 as follows:

16. A package amusement device comprising:

a packaging means for packaging a gift, said packaging means selected from the group of: a box, an enclosing shell, a bag, wrapping paper, ribbon material;

a detection means coupled with said packaging means for detecting interaction with said packaging means;

a microprocessor means coupled to said packaging means and electronically connected to said detection means for generating a pre-programmed signal with respect to said interaction;

a sense-detectible signal generating means electronically connected to said microprocessor means for generating a sense-detectible signal in response to said pre-programmed signal from said microprocessor means.

17. An egg-shell shaped package amusement device, comprising:
an egg-shell shaped housing;
